of offences.

76. Subject to the provisions of section 14 of the Office of the Director of the Public Prosecutions Act, No. 2 of 2010, the Commissioner General or an authorized officer may have power to prosecute offences of the drugs crime under this Act.

Immunity.

77. Commissioner General, an authorized officer or any other person shall not be held liable for anything done in good faith while exercising any power, discharging any duty or performing any function in accordance with the provisions of this Act, regulations or order made thereunder.

Controlled
delivery.

78.-(1) The Commissioner General or an authorized officer may make use of controlled delivery or trap or engage in an undercover operation in order to detect, investigate or uncover the commission of any offence, and the evidence so obtained shall be admissible provided that, the Court considers:

- (a) prior to the setting of controlled delivery, trap or use of an undercover operation, approval, if it was required, was obtained from the Authority or any officer acting on behalf of the Authority to engage such investigation methods and to the extent of instructions given thereof;
- (b) the availability of other techniques for the detection, investigation or uncovering of the commission of the offence or the prevention thereof in the particular circumstances of the case and in the area concerned;

- (c) whether before the controlled delivery or trap was set or the undercover operation was used, there existed any suspicion, entertained upon reasonable grounds, that the accused had the charge relates;
- (d) whether the officer acted in good faith.

(2) The Council may issue general or specific guidelines regarding the supervision and controlled delivery or traps and undercover operations and may require any officer to obtain written approval from the Authority or any officer acting on behalf of the Authority.

Appeal against the decision of the Commissioner General.

79.-(1) Any person aggrieved by a decision of the Commissioner General may, within thirty days from the date of such decision, appeal to the Minister.

(2) The Council shall be informed on all decisions made under subsection (1) of this section.

Security to be provided by the respondent in the appeal.

80.-(1) Where the accused is acquitted or discharged in any case or trial and the prosecutor is not satisfied with that decision; he may tender oral or written notice of intention to appeal immediately after pronouncement of the judgment or ruling.

(2) Where such notice is tendered, the court shall record the same and shall require the acquitted person to furnish security for appearance in the appeal on such terms as the court shall determine.

(3) Where notice of appeal is tendered after the day of the ruling or judgment the court shall immediately summon the respondent to furnish security for appearance on the proceeding of appeal.

Obligation to establish treatment centers of addicts.

81.-(1) The Minister may, by notice published in the Gazette, establish centres for identification, treatment, education, after-care, rehabilitation, social reintegration of addicts subject to such conditions and in a manner as may be prescribed in the regulations.

(2) The regulations referred to under subsection (1) of this section, shall provide for the recruitment of service providers, maintenance, management and supply of drugs for medical necessity in such centers and for other related matters.

Prevention of offence, security for keeping peace and good behavior.

82.-(1) An authorized officer may, without warrant, arrest any person who is apparently a vagrant or who he has reasonable grounds to believe has committed an offence against this Act, and shall take such person before a court as soon as possible.

(2) Where a person is brought before a court in accordance with the provisions of subsection (1) of this section, the court shall inquire into his circumstances, and if, after such inquiry, it finds as a fact that such person is a vagrant the court may order him to be detained.

(3) The court may, at any time after making an order and on the application of any person and on being satisfied that there is no longer any reason for the continuance of such order, revoke such order.

Power of
Authority
to give
directions.

83.-(1) The Authority may give such directions as it may deem necessary to the Government institution or department in implementation of the provisions of this Act, and that institution or department shall comply with such directions.

(2) A person who fails to comply with the provisions of this section commits an offence.

Regulations.

84.-(1) The Minister may make Regulations for better implementation of this Act.

(2) Without prejudice to the generality of the power conferred under subsection (1) of this section, the Minister shall make regulations including:

- (a) the method by which percentages in the case of liquid preparations shall be calculated;
- (b) the authority or the person by whom and the manner in which a document received from any place outside Zanzibar shall be authenticated;
- (c) the drawing of samples, testing and analysis of such samples;
- (d) the manner in which and the conditions subject to which properties confiscated or forfeited shall be managed;
- (e) the disposal of all articles or things confiscated under this Act;
- (f) the manner in which exhibits shall be handled before and after analysis is conducted;
- (g) the rewards to be paid to the officers, informers and other persons;

- (h) the procedures for issuing import or export permit of drugs, certificate or any other authorization; and
- (i) any other matter prescribed under this Act.

Application
of the East
African
Customs
(Manage-
ment and
Tariff) Act.

85.-(1) Prohibitions and restrictions imposed under the East African Customs (Management and Tariff) Act or any International agreement in which the United Republic of Tanzania is a party or is obliged to comply on the importation or exportation from Zanzibar and transshipment of drugs shall be deemed to be prohibitions and restrictions imposed under this Act.

(2) Subject to the provisions of subsection (1) of this section, where an act is an offence under any law applicable in Zanzibar, nothing in that law shall prevent the offender from being punished under this Act, provided that, a person shall not be charged and punished twice for the same offence.

Repeal and
savings.

86.-(1) The Prevention of Illicit Drugs and Trafficking Act, No. 9 of 2009 is hereby repealed.

(2) Notwithstanding the repeal under subsection (1) of this section:

- (a) anything done or any action taken or purported to have been done or taken under any provisions of the repealed Act shall, except in so far as they are inconsistent with the provisions of this Act, continue to be valid and be deemed to be done under the provisions of this Act; and
- (b) anything initiated under the repealed Act which is still pending shall, except in so far as they are inconsistent with the provisions of this Act, be completed and be deemed to have been done under the provisions of this Act.

FIRST SCHEDULE

LIST OF DRUGS [Under sections 2, 20, 21]

FORM NO. ZDCEA 001

LIST OF NARCOTIC DRUGS UNDER INTERNATIONAL CONTROL

in accordance with the

Single Convention on Narcotic Drugs, 1961

Protocol of 25th March, 1972 amending the Single Convention on
Narcotic Drugs, 1961

Purpose

The Yellow List contains the current list of narcotic drugs under international control and additional relevant information. It has been prepared by the International Narcotics Control Board to assist Governments in completing the annual statistical reports on narcotic drugs (Form C), the quarterly statistics of imports and exports of narcotic drugs (Form A) and the estimates of annual requirements for narcotic drugs (Form B) as well as related questionnaires.

The Yellow List is divided into four parts:

- Part 1** provides a list of narcotic drugs under international control in the form of tables and is subdivided into three sections:
- (1) the first section includes the narcotic drugs listed in Schedule I of the 1961 Convention as well as intermediate opiate raw materials;
 - (2) the second section includes the narcotic drugs listed in Schedule II of the 1961 Convention; and
 - (3) the third section includes the narcotic drugs listed in Schedule IV of the 1961 Convention.

Each section contains tables with 4 columns:

- In the 1st column, the International Drug System (IDS) Codes are provided for each scheduled narcotic drug. These codes are assigned to the controlled drugs in the INCB/UNODC drug control system databases containing all submitted statistical data.
- Narcotic drugs in Forms A, B, C submitted in XML format are as such encoded and can then be directly uploaded into the international drug control databases. **Wherever possible, electronic submission in XML format is preferred.**
- In order to facilitate identification of all scheduled narcotic drugs, existing CAS (Chemical Abstracts Service) registry numbers are included in the 2nd column. Please note that the absence of a CAS number does not mean that the narcotic drug concerned is not under international control but that the CAS registry number has not been available, as it is the case in some scheduled plant material.
- The drug names listed in the 3rd column correspond to the ones assigned to the narcotic drugs under international control as scheduled in the 1961 Convention and in the official notifications of the Secretary-General of the United Nations.
- **International non-proprietary names (INN) recommended by the World Health Organization are printed in bold type.**
- The chemical names/descriptions listed in the 4th column provide additional information for easier identification of the scheduled narcotic drugs.

- Part 2** provides a list of the preparations of narcotic drugs exempted from some provisions and included in Schedule III of the 1961 Convention.

- Part 3** provides a list (in alphabetical order) of names and trade names of known preparations of narcotic drugs listed in the Schedules of the 1961 Convention.

Please note: The frequent introduction of new preparations of narcotic drugs and the withdrawal of old ones by the pharmaceutical industry makes the regular updating of the present "Yellow List" necessary for the effectiveness of controls. In pursuit of this objective, the International Narcotics Control Board (INCB) maintains a database containing a list of such preparations. Therefore, Governments are requested to inform INCB of any additions, deletions or amendments that should be made to the present list.

- Part 4** contains tables showing the pure anhydrous drug content of esters, ethers and salts of narcotic drugs listed in the Schedules as well as the equivalents of certain extracts and tinctures, in terms of the pure anhydrous drug.

For more specific information on the names used for narcotic drugs under international control and preparations containing these narcotic drugs, as well as on chemical and structural formulae and other technical information, please see the "Multilingual Dictionary of Narcotic Drugs and Psychotropic Substances under International Control" (ST/NAR/1/REV.2).¹

³ For the calculation of estimates and statistics in accordance with the terms of the 1961 Convention, all preparations made direct from opium are considered to be opium (preparations).

If the preparations are not made directly from opium itself but are obtained by a mixture of opium alkaloids (as is the case, for example, with pantopon, omnopon and papaveretum), they should be considered as morphine (preparations).

Intermediate Opiate Raw Materials

Concentrate of poppy straw (CPS) is the intermediate material arising when any of the five varieties of poppy straw rich in morphine (M), codeine (C), thebaine (T), oripavine (O) or noscapine (N)⁵ has entered into a process for the concentration of its alkaloids and is subsequently referred to as "CPS (M)", "CPS (C)", "CPS (T)", "CPS (O)" or "CPS (N)"⁶. CPS originating from any of the five poppy straw varieties PS (M), (PS (C), PS (T), (PS (O) and (PS (N)) is presented in gross weight quantity (GW) which constitute the raw substance per se with the totality of its different alkaloids and impurities which it might contain. All varieties of CPS, broken down in each of their respective anhydrous alkaloids content, are listed in the table below.

2

PREPARATIONS OF NARCOTIC DRUGS EXEMPTED FROM SOME PROVISIONS AND WHICH ARE INCLUDED IN SCHEDULE III OF THE 1961 CONVENTION

Preparations of

1. ACETYLDIHYDROCODEINE,
CODEINE,
DIHYDROCODEINE,
ETHYLMORPHINE,
NICOCODINE,
NICODICODINE,
NORCODEINE,
PHOLCODINE

when compounded with one or more other ingredients and containing not more than 100 milligrams of the drug per dosage unit and with a concentration of not more than 2.5 per cent in undivided preparations.

2. **PROPIRAM**

containing not more than 100 milligrams of **PROPIRAM** per dosage unit *and compounded with* at least the same amount of methylcellulose.

3. **DEXTROPROPOXYPHENE**

for oral use containing not more than 135 milligrams of **DEXTROPROPOXYPHENE** base per dosage unit or with a concentration of not more than 2.5 per cent in undivided preparations, provided that such preparations do not contain any substance controlled under the 1971 Convention on Psychotropic Substances.

4. COCAINE

containing not more than 0.1 per cent of cocaine calculated as COCAINE base; and

OPIUM or MORPHINE

containing not more than 0.2 per cent of MORPHINE calculated as anhydrous MORPHINE base *and compounded with one or more other ingredients* and in such a way that the drug cannot be recovered by readily applicable means or in a yield which would constitute a risk to public health.

5. **DIFENOXIN**

containing, per dosage unit, not more than 0.5 milligrams of **DIFENOXIN** and a quantity of atropine sulfate equivalent to at least 5 per cent of the dose of **DIFENOXIN**.

6. **DIPHENOXYLATE**

containing, per dosage unit, not more than 2.5 milligrams of **DIPHENOXYLATE** calculated as base and a quantity of atropine sulfate equivalent to at least 1 per cent of the dose of **DIPHENOXYLATE**.

7. *Pulvis ipecacuanhae et opii compositus*

10 per cent OPIUM in powder;
10 per cent ipecacuanha root, in powder well mixed with
80 per cent of any other powdered ingredient containing no drug.

8. Preparations conforming to any of the formulas listed in this Schedule and mixtures of such preparations with any material which contains no drug.

3

NAMES, SYNONYMS AND TRADE NAMES OF KNOWN PREPARATIONS OF NARCOTIC DRUGS LISTED IN THE SCHEDULES OF THE 1961 CONVENTION

This part contains a list in alphabetical order of names given to the narcotic drugs under international control and their known preparations in addition to the names listed in the respective Schedules of the 1961 Convention or Groups of the 1931 Convention. The names of narcotic drugs in the 1961 Convention and INNs are printed in bold type. They are accompanied by a page reference to part 1, where the chemical formulae and trivial names of narcotic drugs, if they exist, can be found. Synonyms and isomers are also cross-referenced to the names of the narcotic drugs as listed in Part 1 of this document, which includes other descriptions or their chemical names.

The other names (mainly synonyms or trade names) either apply to pure narcotic drugs, their salts or to preparations containing either the pure substance or its salt form; in such cases, reference is made to the designations in Part 1. Preparations containing narcotic drugs under international control may have the same name but different formulations, furthermore, the same names may be used for different drugs or preparations in different countries. In such cases, reference should be made to the composition as indicated on the product label, and the denomination for the substance in question should always be checked against its chemical designation or formula.

A preparation may contain, in addition to internationally controlled narcotic drugs, other non-controlled drugs. Such a preparation is subject to the same measures of control as the narcotic drug that it contains, and, if it contains more than one drug, to the measures applicable to the most strictly controlled of those narcotic drugs.

The list of trade names below is meant for reference only and cannot be considered exhaustive. As such, the absence of the name of a preparation containing a narcotic drug on the list does not necessarily imply that this preparation is not under international control. For further information on the names and the chemical and structural formula of the drugs, please see the *Multilingual Dictionary of Narcotic Drugs and Psychotropic Substances under International Control* (ST/NAR/1/REV.2).

Equivalents, in terms of the pure anhydrous drug, of extracts and tinctures

CANNABIS	<p>One kilogram of tincture of cannabis is equivalent to about 100 grams of cannabis, i.e. the conversion factor is 1:10.</p> <p>In general, for cannabis extract preparations, 1 kilogram of extract of cannabis is equivalent to about 7 kilograms of cannabis.</p> <p>In the case of the preparation Sativex®, 1 kilogram of extract of cannabis should be considered equivalent to 12.6 kilograms of cannabis (10 ml Sativex® solution should be considered equivalent to 10 g of cannabis).*</p>
COCA LEAF**	<p>One kilogram of tincture of coca leaf containing 0.1 per cent of cocaine, i.e. 1 gram of cocaine, should be considered to be equivalent to 200 grams of coca leaf.</p> <p>One kilogram of fluid extract of coca leaf containing 0.5 per cent of cocaine, i.e. 5 grams of cocaine, is equivalent to 1 kilogram of coca leaf.</p>
OPIUM***	<p>One kilogram of tincture of opium is equivalent to 100 grams of opium.</p> <p>One kilogram of extract of opium is equivalent to 2 kilograms of opium.</p>

* According to the information supplied by the manufacturer.

** For the calculation of estimates and statistics in accordance with the terms of the 1961 Convention, coca leaf preparations containing more than 0.1 per cent of cocaine and made direct from coca leaf should be considered to be coca leaf (preparations).

*** For the calculation of estimates and statistics in accordance with the terms of the 1961 Convention, all preparations made directly from opium are considered to be opium (preparations). If the preparations are not made directly from opium itself but are obtained by a mixture of opium alkaloids (as is the case, for example, with pantopon, omnopon and papaveretum) they should be considered as morphine (preparations).

**List of
Precursors and chemicals
Frequently used in the illicit manufacture of narcotic
drugs and psychotropic substances under
International Control**

In accordance with the
United Nations Convention against Illicit Traffic
in Narcotic Drugs and Psychotropic Substances, 1988

Introduction

This list has been prepared by the International Narcotics Control Board (INCB) as a tool to be used for the identification of substances scheduled in Tables I and II of the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances, 1988 (1988 Convention).

All those involved with the implementation of the provisions of article 12 of the 1988 Convention, including regulatory, administrative and law enforcement authorities, will find the list helpful. For example, it will be required to complete the Board's Form D, "Annual information on substances frequently used in the illicit manufacture of narcotic drugs and psychotropic substances", as required under the provisions of article 12, paragraph 12. It will also be required by regulatory and administrative authorities to check the names of chemicals associated with, *inter alia*, applications for authorizations for export or import. Law enforcement authorities will require the information, *inter alia*, to check documentation accompanying consignments of chemicals and to further identify chemicals seized at illicit laboratories.

The list is comparable to the lists of narcotic drugs and psychotropic substances under international control, and the alphabetical listings of other names and trade names of narcotic drugs and psychotropic substances, which are published by the Board as the "Yellow List" and the "Green List", respectively.

Part One gives a list of those substances scheduled in Tables I and II of the 1988 Convention. The list is divided into two sections, the first listing those substances included in Table I, and the second listing those substances in Table II. English, French and Spanish names as used in the respective versions of the Tables of the 1988 Convention are given, as well as Harmonized System (HS) codes and Chemical Abstracts Service (CAS) registry numbers, to facilitate rapid identification of all scheduled substances. The full Chemical Abstracts Index name of each substance is given also for reference purposes.

Part Two lists in alphabetical order the chemical names, synonyms and trade names, etc., of the substances included in Part One. Although not explicitly stated in the 1988 Convention, it is understood that the name of each of those substances, as given in the Tables of the Convention, covers also all isomeric forms of the substance. Consequently, it should be noted that where a specific isomer is listed in Part Two, for example *l*-ephedrine as a synonym for ephedrine, this should not be understood to mean that only the *l*-form of ephedrine is controlled.

Part Three provides a table of conversion factors needed to convert quantities of scheduled substances in their salt form into quantities of pure anhydrous base.

Regular updating of the information provided in this list, particularly that relating to the chemical names, synonyms and trade names, etc., of scheduled substances, will be necessary to ensure the effectiveness of controls. Governments are kindly requested to provide the Board with any additions and/or amendments to the information provided to ensure that this database is maintained up to date.

For additional synonyms, trade names, and individual monographs of the scheduled substances, Governments are referred to the "Multilingual Dictionary of Precursors and Chemicals Frequently Used in the Illicit Manufacture of Narcotic Drugs and Psychotropic Substances under International Control", produced by the Laboratory and Scientific Section of UNODC, which can be accessed at:

PART ONE: SUBSTANCES SCHEDULED IN TABLES I AND II OF THE 1988 CONVENTION

English, French and Spanish names as used in the respective versions of Tables I and II of the 1988 Convention are given, as well as Harmonized System (HS) codes and Chemical Abstracts Service (CAS) registry numbers¹, to facilitate rapid identification of all scheduled substances. Chemical Abstracts Index names are given in parentheses.

SUBSTANCES INCLUDED IN TABLE I

Acetic anhydride Anhydride acétique Anhídrido acético	(acetic oxide) HS code: 2915.24 CAS number: 108-24-7

Safrol	

The salts of the substances listed in this Table whenever the existence of such salts is possible.

[#] Since January 2017, the World Customs Organization's *Harmonized System (HS) Nomenclature* includes new code numbers for pharmaceutical preparations containing ephedrine, pseudoephedrine and norephedrine, as follows:

3003.41 – Containing ephedrine or its salts
 3003.42 – Containing pseudoephedrine (INN) or its salts
 3003.43 – Containing norephedrine or its salts
 (Note: subheading 3003 concerns medications in bulk)

3004.41 – Containing ephedrine or its salts
 3004.42 – Containing pseudoephedrine (INN) or its salts
 3004.43 – Containing norephedrine or its salts
 (Note: subheading 3004 concerns retail medications)

SUBSTANCES INCLUDED IN TABLE II

Acetone Acétone Acetona	(2-propanone) HS code: 2914.11 CAS number: 67-64-1
Anthranilic acid Acide anthranilique Acido antranílico	(2-aminobenzoic acid) HS code: 2922.43 CAS number: 118-92-3
Ethyl ether Ether éthylique Eter etílico	(1,1'-oxybis[ethane]) HS code: 2909.11 CAS number: 60-29-7
Hydrochloric acid³ Acide chlorhydrique Acido clorhídrico	(hydrochloric acid) HS code: 2806.10 CAS number: 7647-01-C
Methyl ethyl ketone Méthyléthylcétone Metiletilcetona	(2-butanone) HS code: 2914.12 CAS number: 78-93-3
Piperidine Pipéridine Piperidina	(piperidine) HS code: 2933.32 CAS number: 110-89-4
Sulphuric acid³ Acide sulfurique Acido sulfúrico	(sulfuric acid) HS code: 2807.00 CAS number: 7664-93-5
Toluene Toluène Tolueno	(benzene, methyl-) HS code: 2902.30 CAS number: 108-88-3

The salts of the substances listed in this Table whenever the existence of such salts is possible.

PART TWO: CHEMICAL NAMES, SYNONYMS AND TRADE NAMES, ETC., OF SCHEDULED SUBSTANCES AND THEIR SALTS, IN ALPHABETICAL ORDER

The names of substances as given in the 1988 Convention are printed in **bold type**. They are accompanied by a reference to whether the related substances are scheduled in Table I or Table II of the 1988 Convention, as detailed in PART ONE.

Listed chemical names, synonyms and trade names apply sometimes to pure substances and sometimes to the salts of those substances. In all such cases, reference is made to the substance name as given in PART ONE. Commercial products identified by their trade names usually contain a scheduled substance mixed with one or more other ingredients. As indicated in the Introduction it is understood that the names of the substances, as given in the Tables of the Convention, cover all isomeric forms of the substances.

The list does not assume to be comprehensive. The absence of any chemical name, synonym or trade name, etc., for a scheduled substance does not necessarily mean that the substance with that name is not under international control. Further, it should be noted that the same name, particularly common or trade names, may be used for different substances in different countries. In cases where ambiguity may occur, it is recommended that the name of the substance in question should always be checked against the chemical designation or formula.

All chemical names, synonyms and trade names are listed alphabetically wherever possible. Chemical names with a prefix are included at the respective alphabetical position of the substance itself. Thus, for example,

N-acetylaminobenzoic acid is listed under "a",
trans-ephedrine is listed under "e",
D-lysergic acid is listed under "l",
1,2-methylenedioxy-4-allyl-benzene is listed under "m",
(+)-pseudoephedrine is listed under "p", and
 α -toluic acid is listed under "t", etc.

**PART THREE: TABLE SHOWING THE PURE ANHYDROUS BASE CONTENT
OF SOME SCHEDULED SUBSTANCES IN THEIR SALT FORM**

Substance	Base or salt	Approximate pure anhydrous base content (percentage)
Ephedrine	Base hemihydrate (0.5H ₂ O)	95
	Hydrochloride	82
	Nitrate	72
	Sulphate (2 mol. base)	77
Ergometrine	Hydrochloride	90
	Maleate	74
	Oxalate	82
	Tartrate (2 mol. base)	81
Ergotamine	Hydrochloride	94
	Succinate (2 mol. base)	91
	Tartrate (2 mol. base)	89
Norephedrine	Hydrochloride	80
Piperidine	Aurichloride	20
	Bitartrate	36
	Hydrochloride	70
	Nitrate	58
	Phosphate	46
	Picrate	27
	Platinichloride (2 mol. base)	29
	Thiocyanate	59
Pseudoephedrine	Hydrochloride	82
	Sulphate (2 mol. base)	77

The above table of conversion factors should be used to convert quantities of scheduled substances in their salt form into quantities of pure anhydrous base.

SECOND SCHEDULE

OATH OF ALLEGIANCE [Under section 5(3)]

FORM NO. ZDCEA 002

I, Swear by Almighty God that I will be faithful to Zanzibar and its people and that I will serve as a Commissioner General to the Zanzibar Drugs Control and Enforcement Authority, whole heartedly and that I shall defend and protect the interest, well being and welfare of the people of Zanzibar in accordance with the established laws.
